

# MedOnGo Covid-19

## Home Services

### Stay Safe & Save your family from Covid-19 & other Infections

- MedOnGo is a Primarcare Health Services company with the mission to create "First Line of Defence" in Public Health
- Our goal is to stop covid, find infection at early stage, provide services to patients in remote places and also provide services to non covid patients to avoid coming to Hospital so that Beds in Hospitals can be used for acute patients, reduce costs and drastically improve efficiency and availability.
- Established Smart Clinics and Smart Kiosks in about 10 states of India.
- Have served more than 10 million people with 17 million consultations.
- The solution is combination of antiviral nanotechnology materials, Medical Devices, IT with unused bandwidth of Doctors ,the capacity to treat patients will increase overnight
- This combination is first of its kind in India
- Providing services to community surveillance to avoid covid and to isolate and treat covid patients at an early stage to avoid progression of the illness.
- If the patient condition deteriorate, (orange code), then start process to transfer patient to Hospital for higher care
- Monitor and help post covid treatment by analysing the medications and side effects for full recovery.

# Anti-Viral Covid Protection Kit & Devices

Antiviral **Bedsheet**

Antiviral **Pillow Cover**

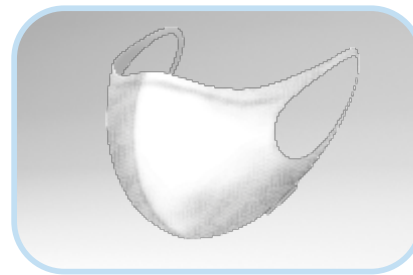

Antiviral **Towel**

**Oxygen Concentrator**

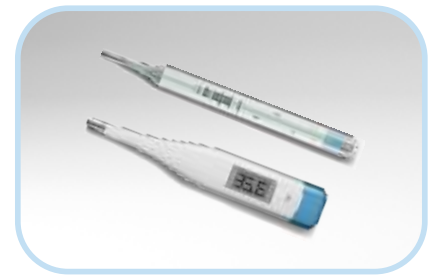

Antiviral **Jumpsuit**

Antiviral **Face Mask**

**Pulse Oximeter**

**Thermometer**

- The kit combines an AntiViral Bed Sheet, Pillow cover, Towel, Face Mask, Jumpsuit, Handkerchief along with the devices as per the package chosen by the customer/patient. MedOnGo also supplies other Nano products based on the needs of the customer/patients .
- All products under kit are tested for Corona/other viruses and bacteria\*, upto 99.99 percent reduction.
- The patient under care can use all this antiviral protecting clothing and linen during entire period of covid pandemic and more so during quarantine/isolation
- The NanoTechnology embedded active fibers of each product traps and kills Corona.
- The Anti odour technology helps reduce the requirement of frequent washing. The Anti Leaching property helps it to wash along with other cloths or to keep in the common cupboard.
- The Product is safer for newborns due its Non-Metal, Non-Silver technology. Each product is washable up to ten times which is good enough for complete 15days home quarantine period.
- Made of 100% cotton, each product under kit is absolutely durable and long lasting as regular linen.
- All products are tested for ISO18184 by NABL Labs like Bureau Veritas and MSL UK. Complete manufacturing in India with its country made best Cotton, ISO 13485 certifies the quality of products.
